

Medical Providers Offering Telehealth Services

If you are feeling ill or have health related questions, please do not delay accessing care.

- Ask your doctor's office if they offer telehealth services for routine appointments or some sick visits. Telehealth is a tool that can help you connect with your doctor using technology, such as a telephone consult or through a live video from a smartphone, tablet, or computer.
- Call your doctor's office with any questions or health concerns. If you think you have or may have sCOVID-19 (fever, shortness of breath, cough) your health care provider will instruct you on what to do next. For a serious emergency, call 911.

Below are some medical clinics that offer telehealth services. Some clinics may not be accepting new patients at this time, so please call ahead.
